

PRODUCT CATALOGUE · 2026 RANGE

Commercial display catalogue

Digital signage, kiosks, video walls, interactive and outdoor displays, supplied, installed and supported by Be Screen.

SELL

INFORM

GUIDE

IMPRESS

ENGAGE

PERFORM

The right screen, chosen for the job, not the other way round.

This catalogue covers the commercial display hardware Be Screen supplies across New Zealand, Australia and India: shelf-edge bar displays, floor and wall signage, self-order kiosks, video walls, interactive whiteboards and high-brightness outdoor screens.

We don't sell a box and walk away. Every display is specified against what it has to do (sell, inform, guide, impress, engage or perform), then installed, loaded with content and supported by one team under one agreement.

Specify	Supply	Install	Content	Support
Size, brightness, touch and mounting matched to the site	Hardware sourced and checked before it ships	Mounting, power, network and commissioning	Design, scheduling and the platform to run it	Monitoring, fixes and changes after go-live

Sizes, specifications and options shown are the manufacturer's for the current range. They change from time to time, so the exact model, specification and price are confirmed in writing with every quote. Product and application imagery is indicative. Custom sizes, housings and finishes are available on request.

RANGE OVERVIEW

Commercial LCD display range	03
------------------------------	----
